Beacon · offline controlled contract example
Authored fixture; no new LLM inference or human review
q1: do {'G': 0}; outcome set [1]
Grid available
G · 1 → 0
Boundary input
Backup charged
B · 1 (unchanged)
Boundary input
Supplies current without backup
e1 · explicit
Supplies current without grid
e2 · explicit
Current available
P · 1 (unchanged)
Joint mechanism mP
Safety shutter closed
S · 0 (unchanged)
Boundary input
Energizes the exposed lamp
e3 · explicit
Blocks visible illumination
e4 · explicit
Beacon illuminated
Y · 1 (unchanged)
Joint mechanism mY
Solid: explicit controlled-text relationship
Dashed: unresolved hypothesis; no identified function
Purple border: intervention; orange fill: unresolved state
Edge/joint IDs link to the mechanism catalogue
