01 | Escalation into Stark-Lannister armed conflict

causal overview - generated TV interpretation

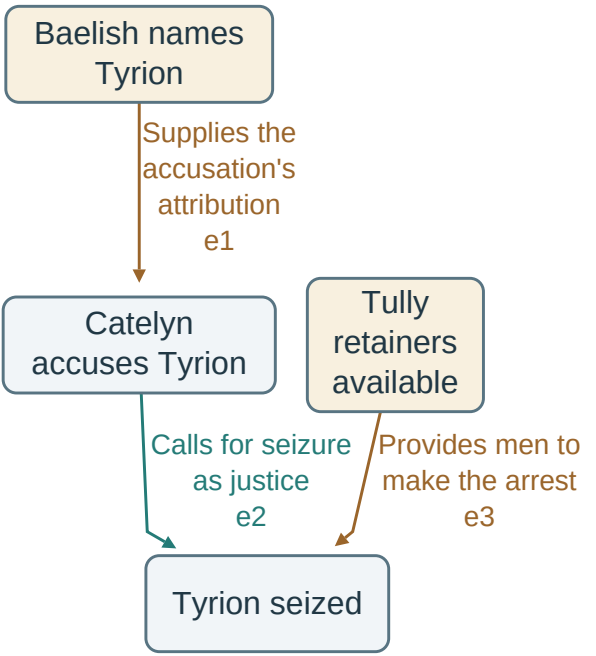

Outcome: Tywin orders Jaime to take a field army against the Riverlands by S01E07.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

02 | Escalation into Stark-Lannister armed conflict

mechanism detail - generated TV interpretation

Joint mechanism M_C

The conditional seizure route requires both the appeal and available retainers.

Passages: s01e04_S19

Partial function: 1 observed row; 3 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

03 | Escalation into Stark-Lannister armed conflict

What changes under the declared alternatives?

Tywin orders Jaime to take a field army against the Riverlands by S01E07.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
Without Baelish's attribution of the dagger to Tyrion, does Tywin still order this field deployment?	**Unknown**	**No**	**Yes**
If Ned issues no punitive writ or summons, does Tywin still commit the army?	**Unknown**	**Yes**	**Yes**
If neither the dagger attribution nor Ned's punitive writ occurs, does the military commitment follow?	**Unknown**	**No**	**No**

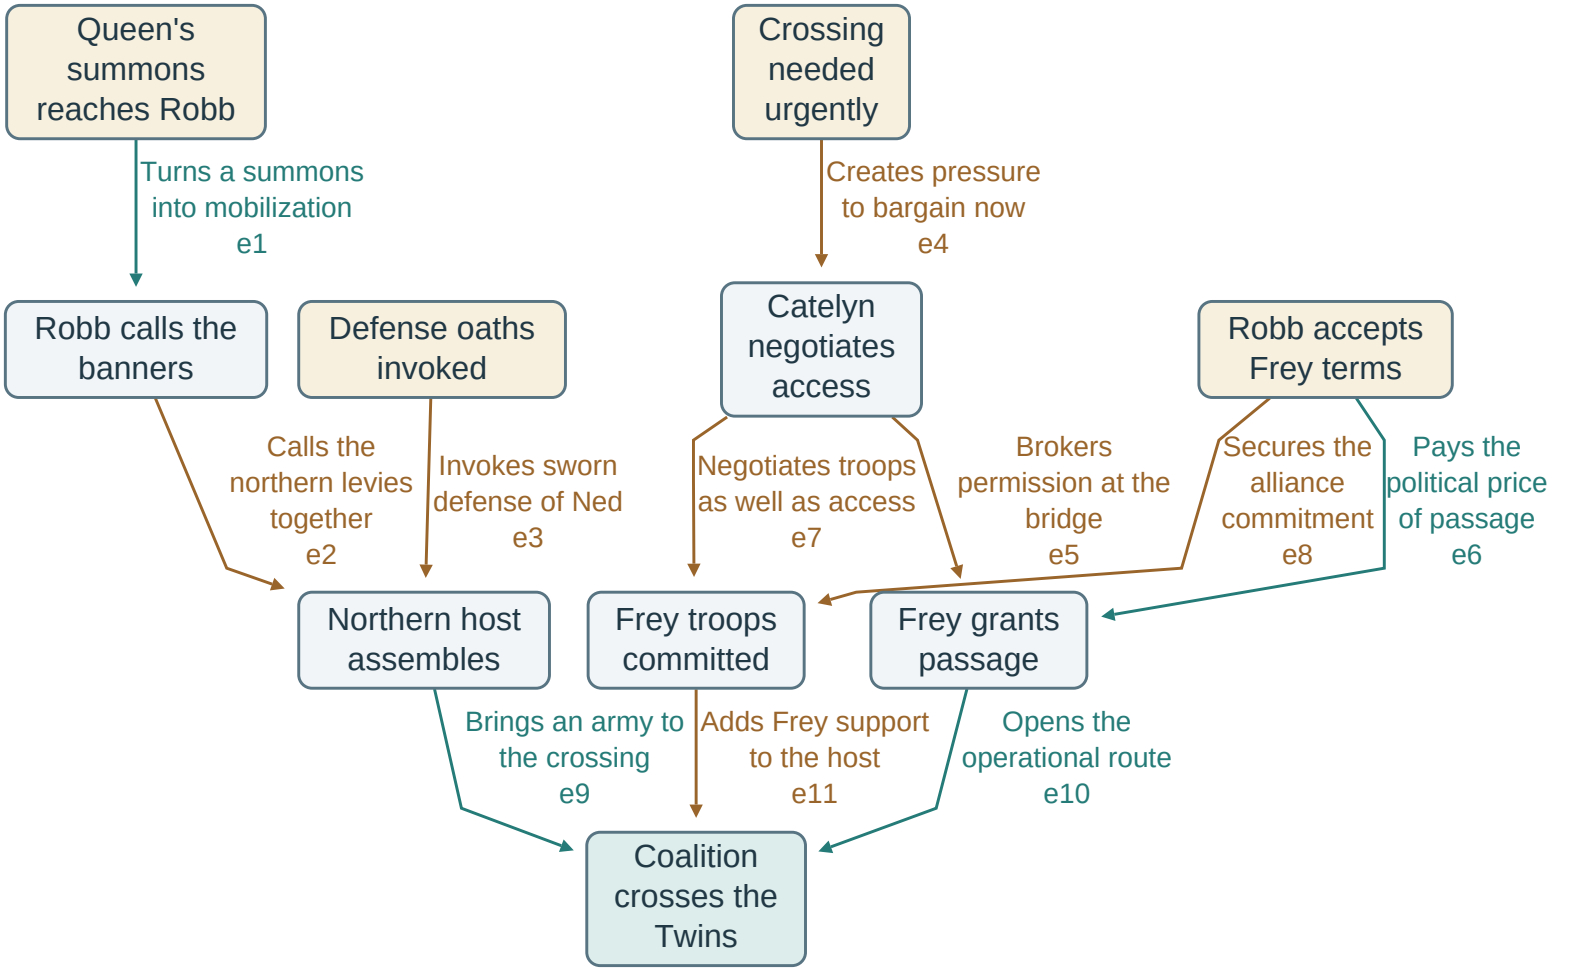

A: Available forces and the captivity-related reputational concern produce the army order; the summons has no additional effect.

B: With forces available, either the captivity-related concern or the royal challenge can motivate the army order. The second route is hypothetical.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.

04 | Northern mobilization and Robb Stark's coalition

causal overview - generated TV interpretation

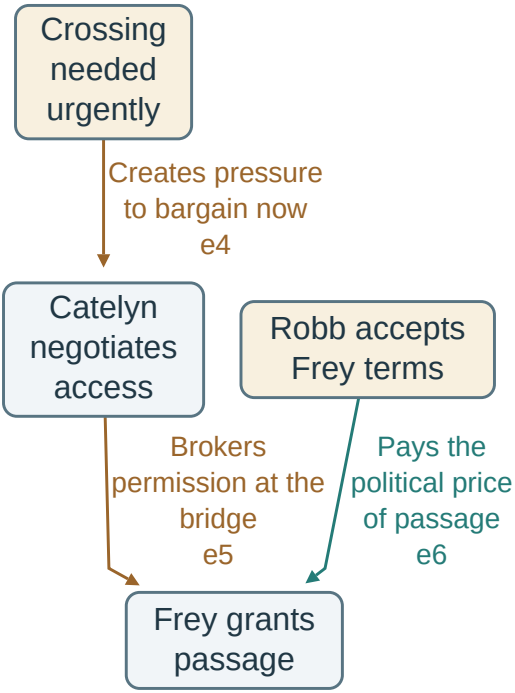

Outcome: Robb's assembled northern host obtains and uses the Twins crossing with Frey military support by S01E09.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

05 | Northern mobilization and Robb Stark's coalition

mechanism detail - generated TV interpretation

Joint mechanism M_G

One scenario requires Catelyn's particular mediation; another treats the accepted terms as sufficient under the stated alternative possibility of Robb bargaining himself.

Passages: s01e09_S2, s01e09_S4

Partial function: 1 observed row; 3 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

06 | Northern mobilization and Robb Stark's coalition

What changes under the declared alternatives?

Robb's assembled northern host obtains and uses the Twins crossing with Frey military support by S01E09.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
If Catelyn does not conduct the negotiation but Robb accepts the terms, does the coalition still cross?	**Unknown**	**No**	**Yes**
If Robb refuses the stated Frey terms, does the coalition cross within this time window?	**Unknown**	**No**	**No**
If Robb neither calls the banners nor accepts Frey's terms, does this crossing coalition form?	**Unknown**	**No**	**No**

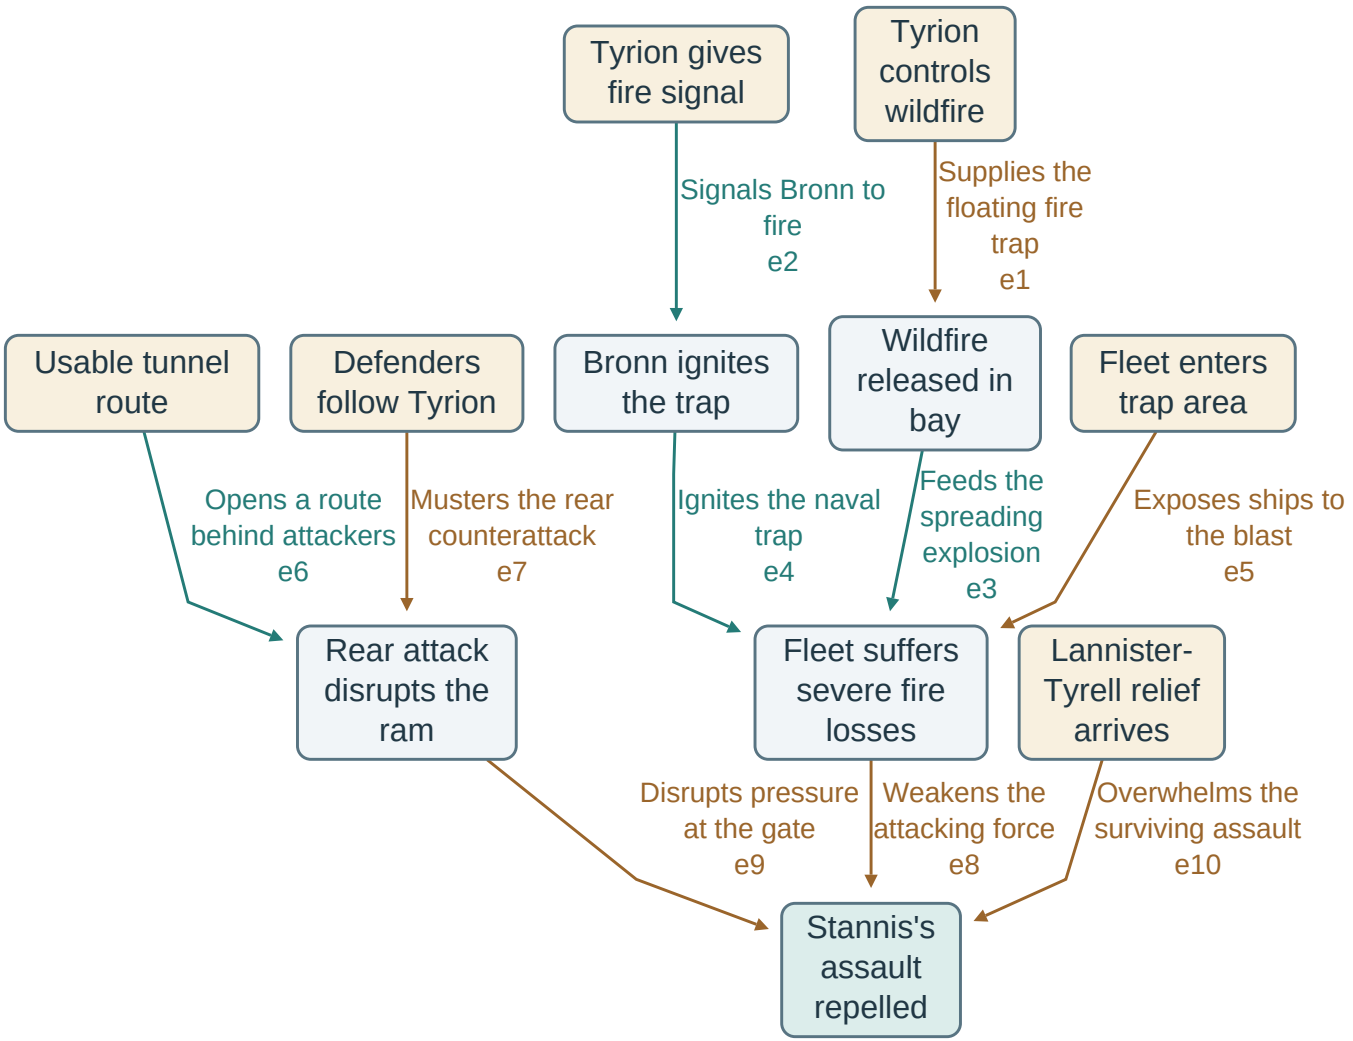

A: Passage and aid require both Catelyn's mediation and acceptance of the terms.

B: Accepted terms suffice through an available negotiating channel; Robb's proposed personal approach could substitute for Catelyn. This is hypothetical.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.

07 | The Battle of the Blackwater

causal overview - generated TV interpretation

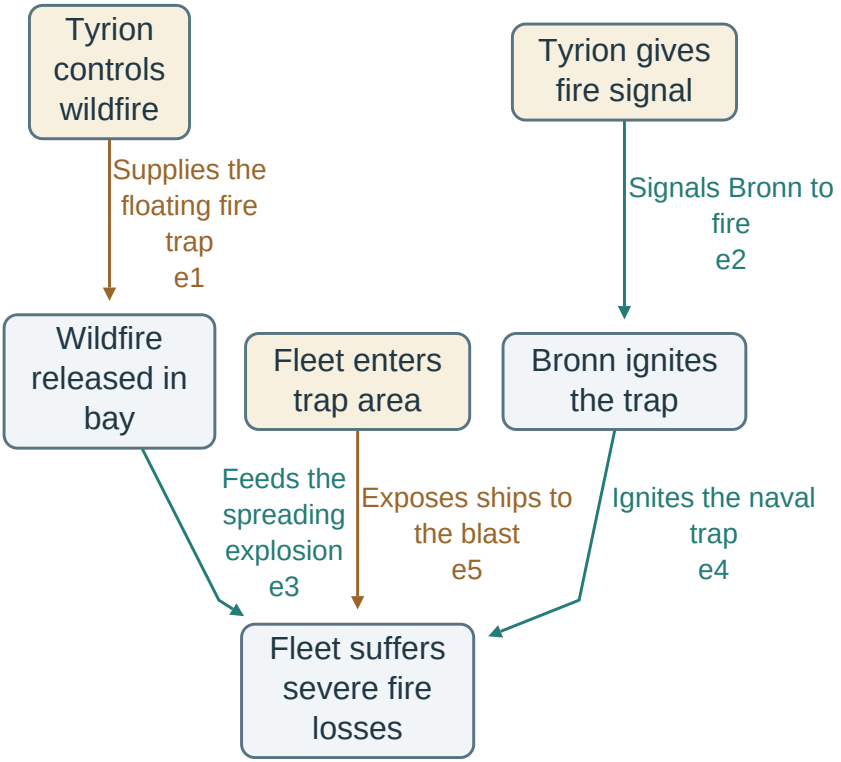

Outcome: Stannis's assault on King's Landing is repelled by the end of the Blackwater battle in S02E09.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

08 | The Battle of the Blackwater

mechanism detail - generated TV interpretation

Joint mechanism M_D

The conditional trap model requires all three for this particular loss route; that conjunction is an explicit physical-scope assumption.

Passages: s02e09_S12, s02e09_S14, s02e09_S16, s02e09_S19

Partial function: 1 observed row; 7 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

09 | The Battle of the Blackwater

What changes under the declared alternatives?

Stannis's assault on King's Landing is repelled by the end of the Blackwater battle in S02E09.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
If Bronn's trap ignition fails, with the other boundary circumstances fixed, is the assault still repelled?	**Unknown**	**Yes**	**Yes**
Without timely Lannister-Tyrell relief, do the observed earlier defensive actions suffice to repel Stannis?	**Unknown**	**No**	**Yes**
Without both timely relief and the defenders joining Tyrion's sortie, is the assault repelled?	**Unknown**	**No**	**No**

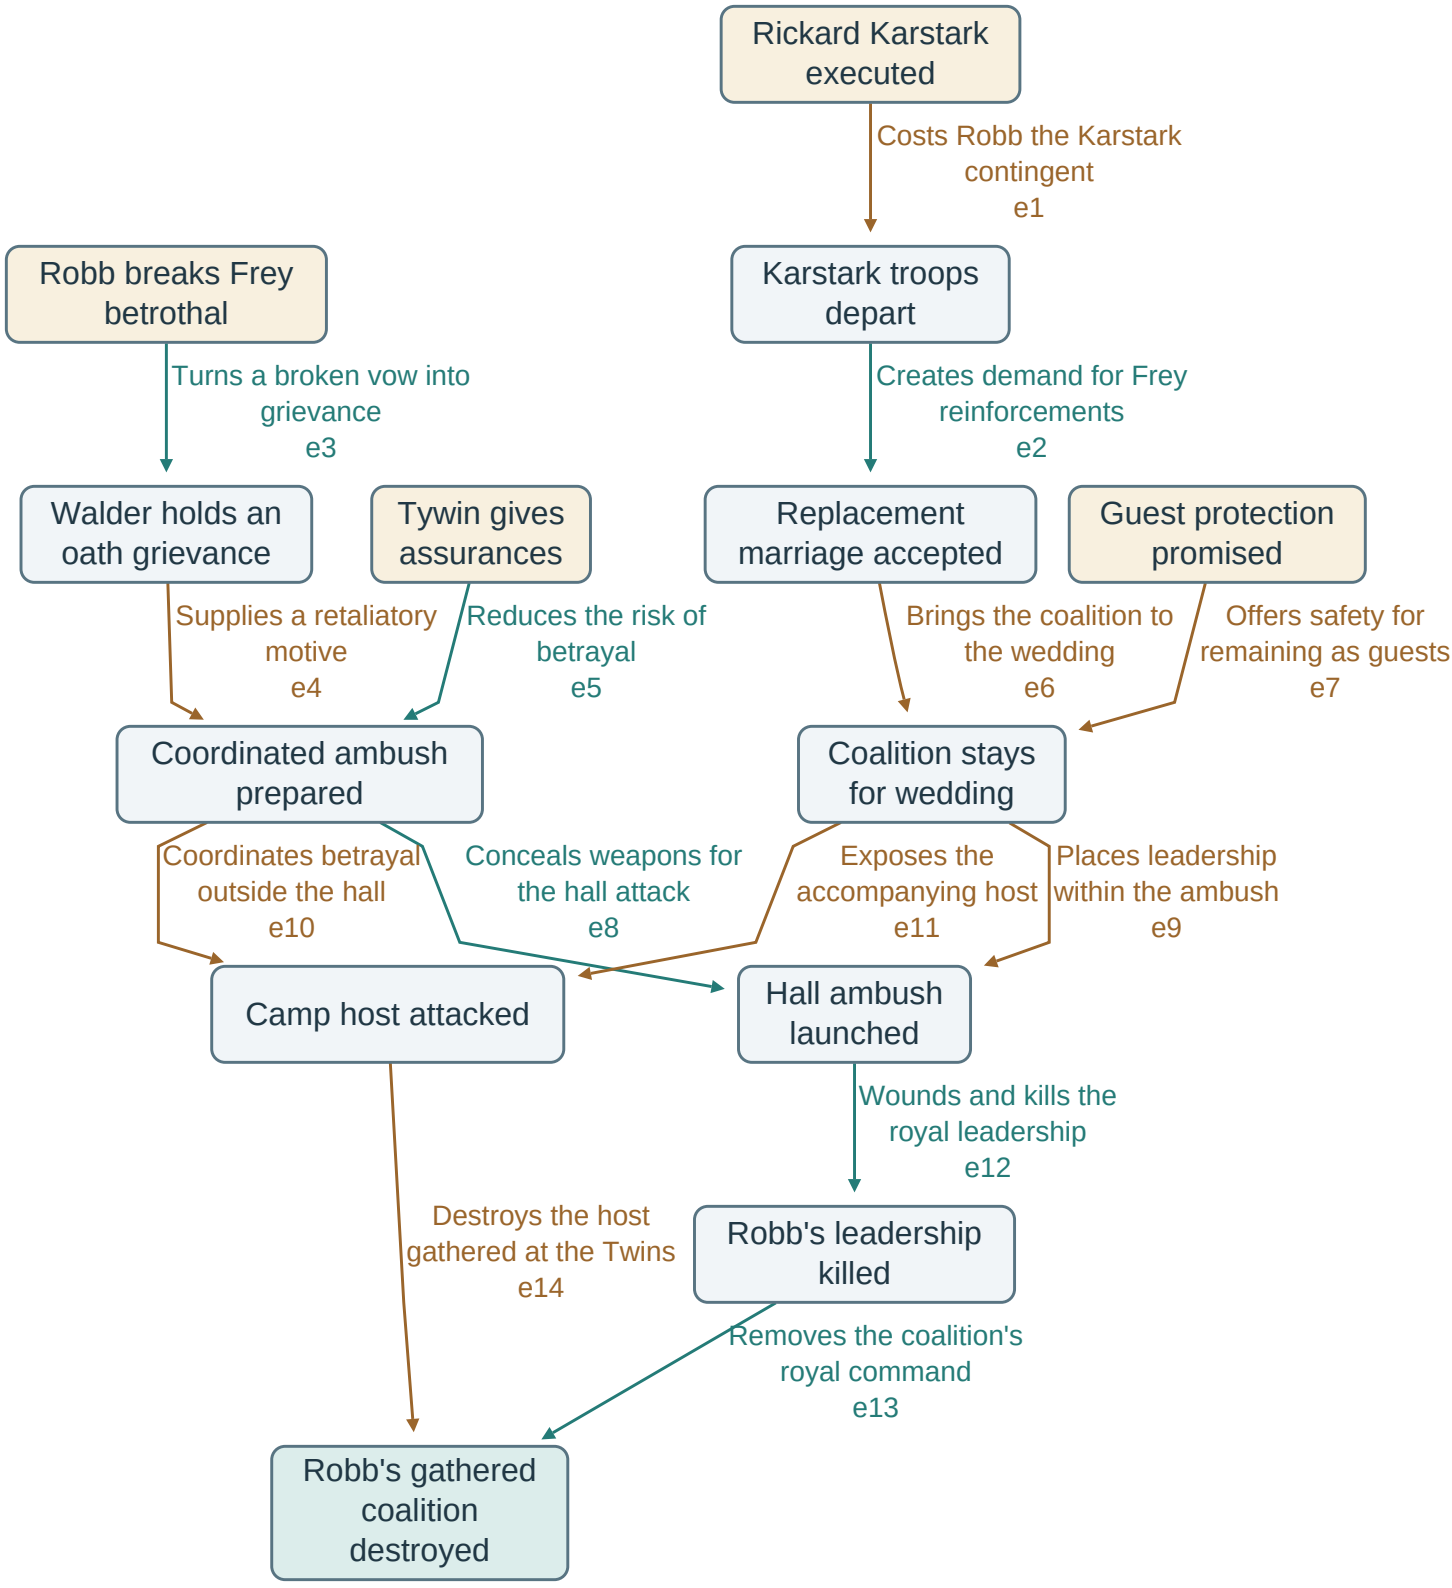

A: Relief is necessary and requires either naval attrition or the gate disruption to arrive before irreversible defeat.

B: Timely relief suffices in this scope; without it, both naval attrition and the successful sortie together suffice.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.

10 | The Red Wedding and Robb's coalition collapse

causal overview - generated TV interpretation

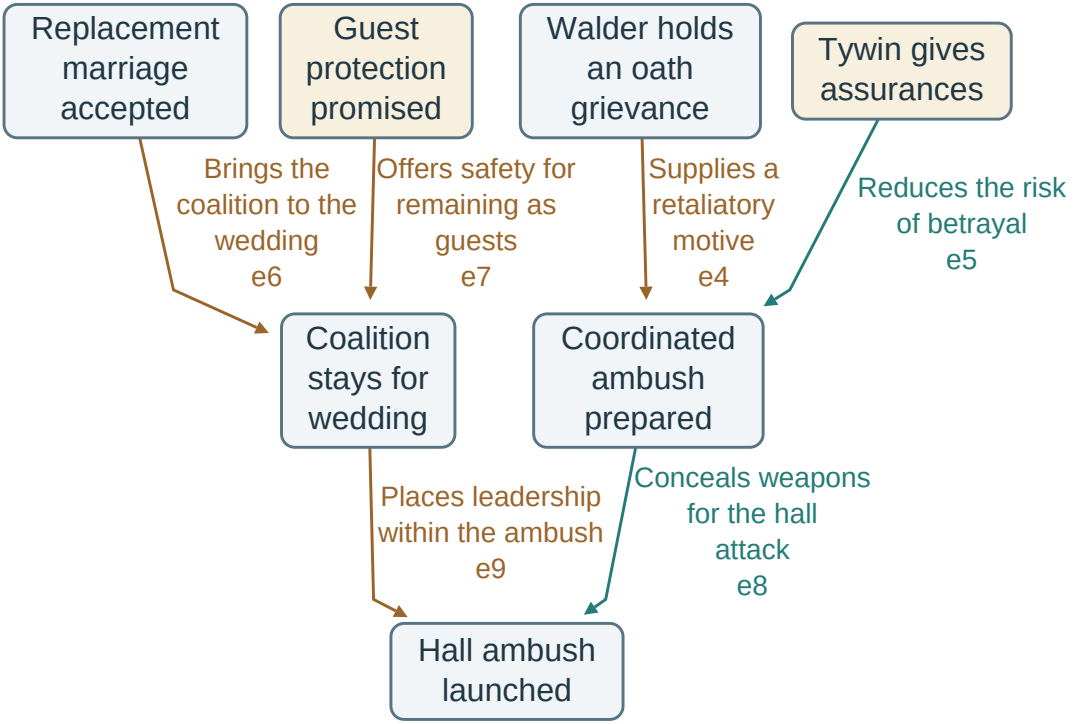

Outcome: Robb's royal leadership and accompanying host are destroyed at the Twins during the Red Wedding by S03E09.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

11 | The Red Wedding and Robb's coalition collapse

mechanism detail - generated TV interpretation

Joint mechanism M_X

The hall attack requires prepared attackers and present targets.

Passages: s03e09_S16, s03e09_S17

Partial function: 1 observed row; 3 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

12 | The Red Wedding and Robb's coalition collapse

What changes under the declared alternatives?

Robb's royal leadership and accompanying host are destroyed at the Twins during the Red Wedding by S03E09.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
If Walder bears no grievance over the broken vow, does the gathered coalition still collapse?	**Unknown**	**No**	**Yes**
Without Tywin's prior assurances, does the Red Wedding collapse occur?	**Unknown**	**No**	**No**
If there is no prepared plot and the coalition does not remain at the wedding, does this collapse occur?	**Unknown**	**No**	**No**

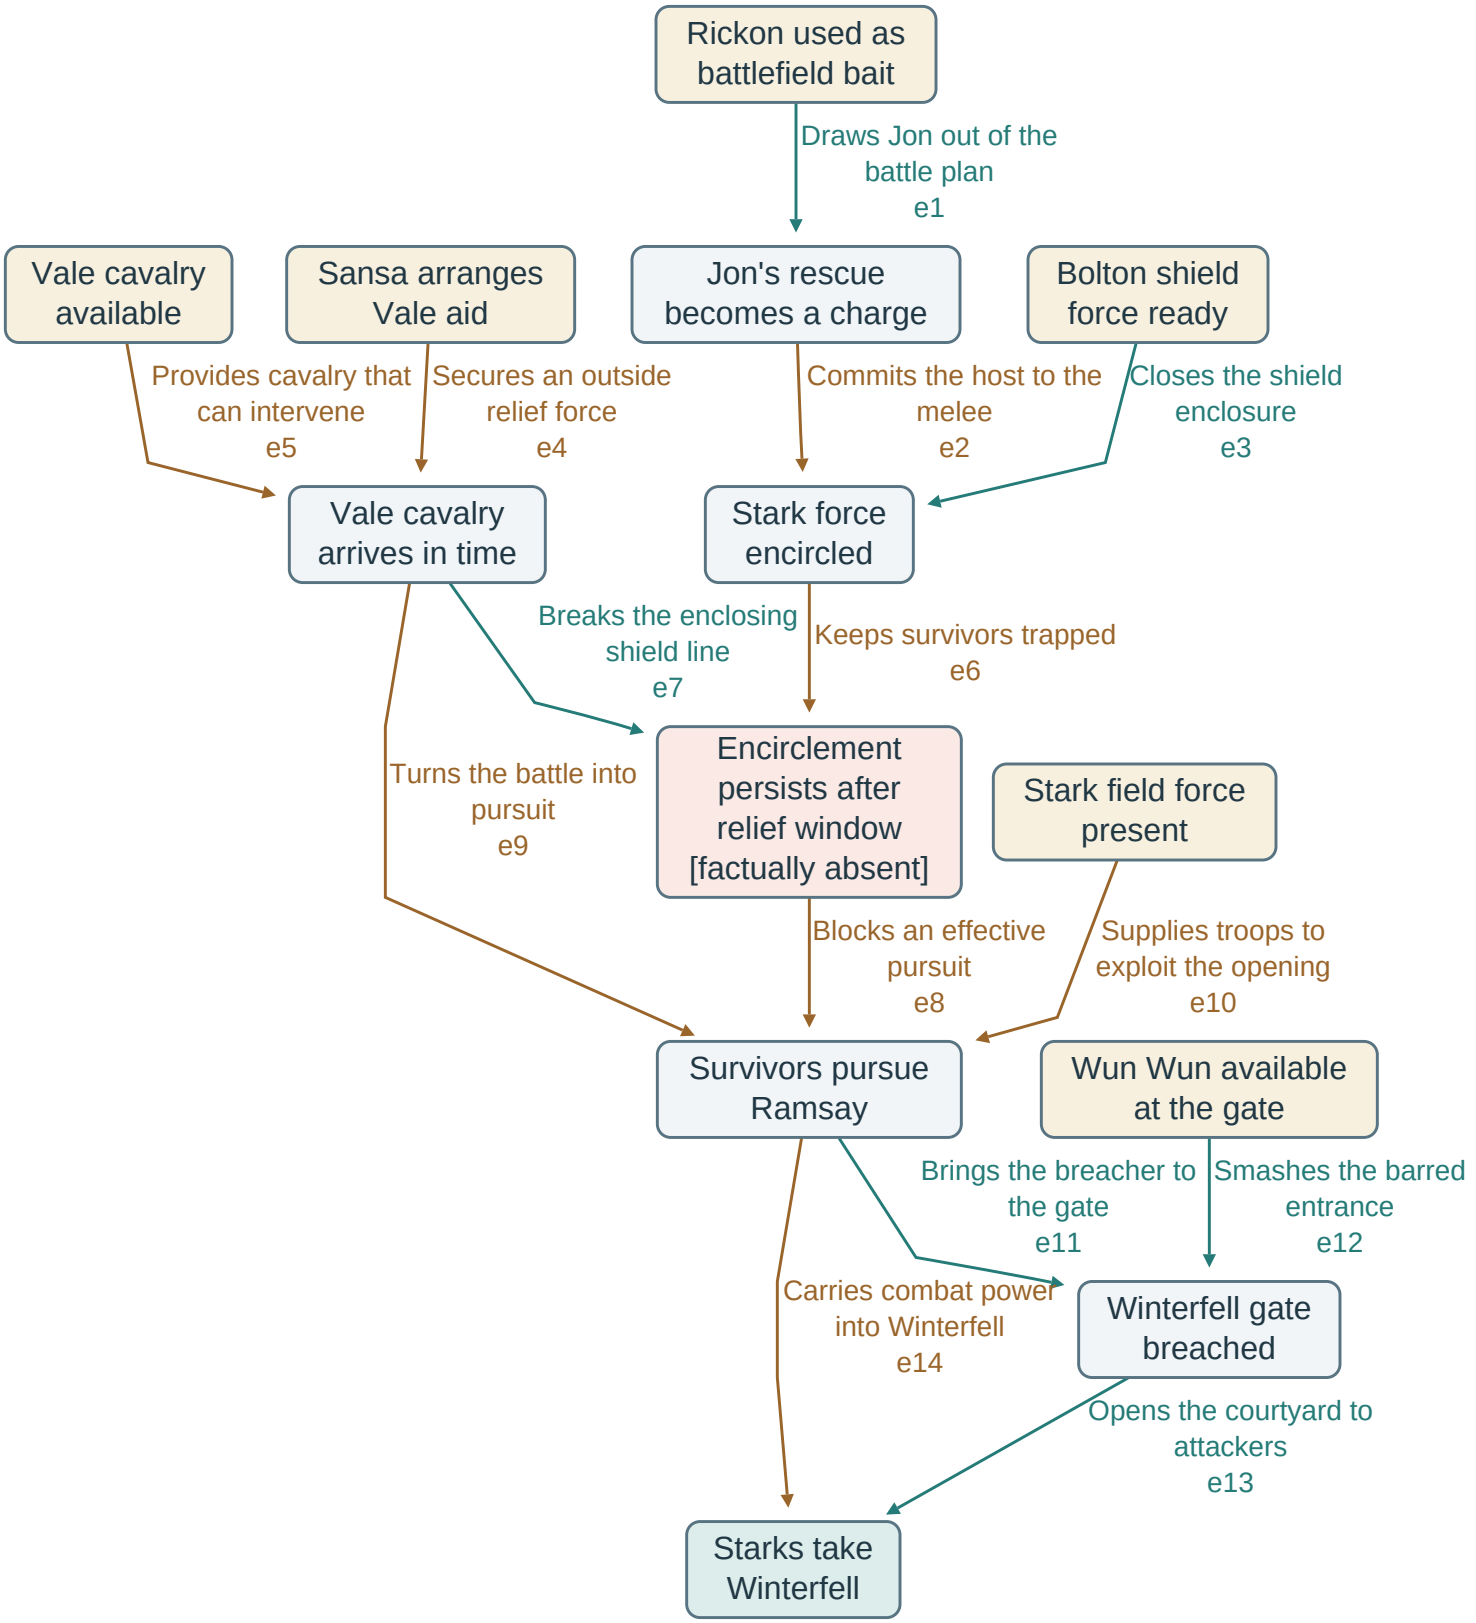

A: The plot requires both Walder's grievance and Tywin's assurances.

B: Tywin's assurances suffice for the plot under fixed strategic motives, even without Walder's grievance.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.

13 | The northern campaign against Bolton rule

causal overview - generated TV interpretation

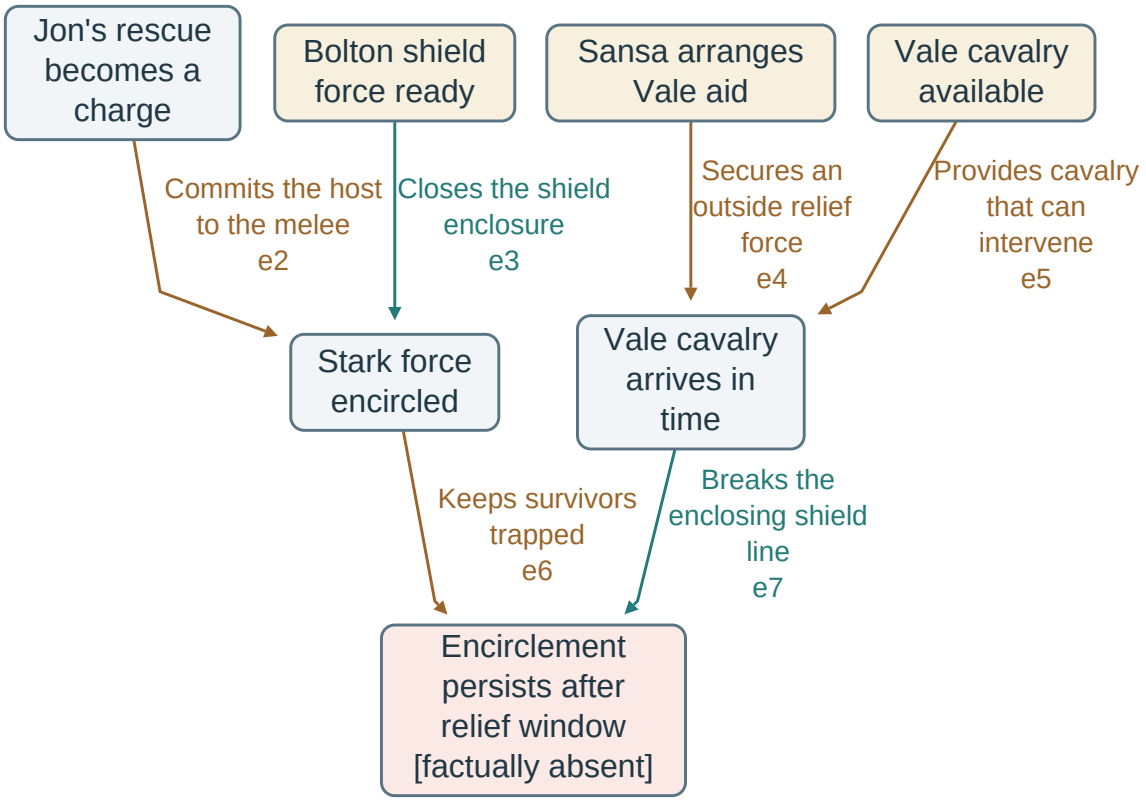

Outcome: The Stark-led coalition takes Winterfell and ends Ramsay Bolton's control by the end of S06E09.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

14 | The northern campaign against Bolton rule

mechanism detail - generated TV interpretation

Joint mechanism M_H

The modeled obstruction remains exactly when the trap formed and timely cavalry is absent; relief inhibits it.

Passages: s06e09_S10

Partial function: 1 observed row; 3 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

15 | The northern campaign against Bolton rule

What changes under the declared alternatives?

The Stark-led coalition takes Winterfell and ends Ramsay Bolton's control by the end of S06E09.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
Without timely Vale relief, do the Starks take Winterfell?	**Unknown**	**No**	**No**
If Ramsay does not use Rickon as bait, do the Starks still take Winterfell?	**Unknown**	**Yes**	**Yes**
Without both Rickon's bait and timely Vale relief, do the Starks take Winterfell?	**Unknown**	**No**	**Yes**

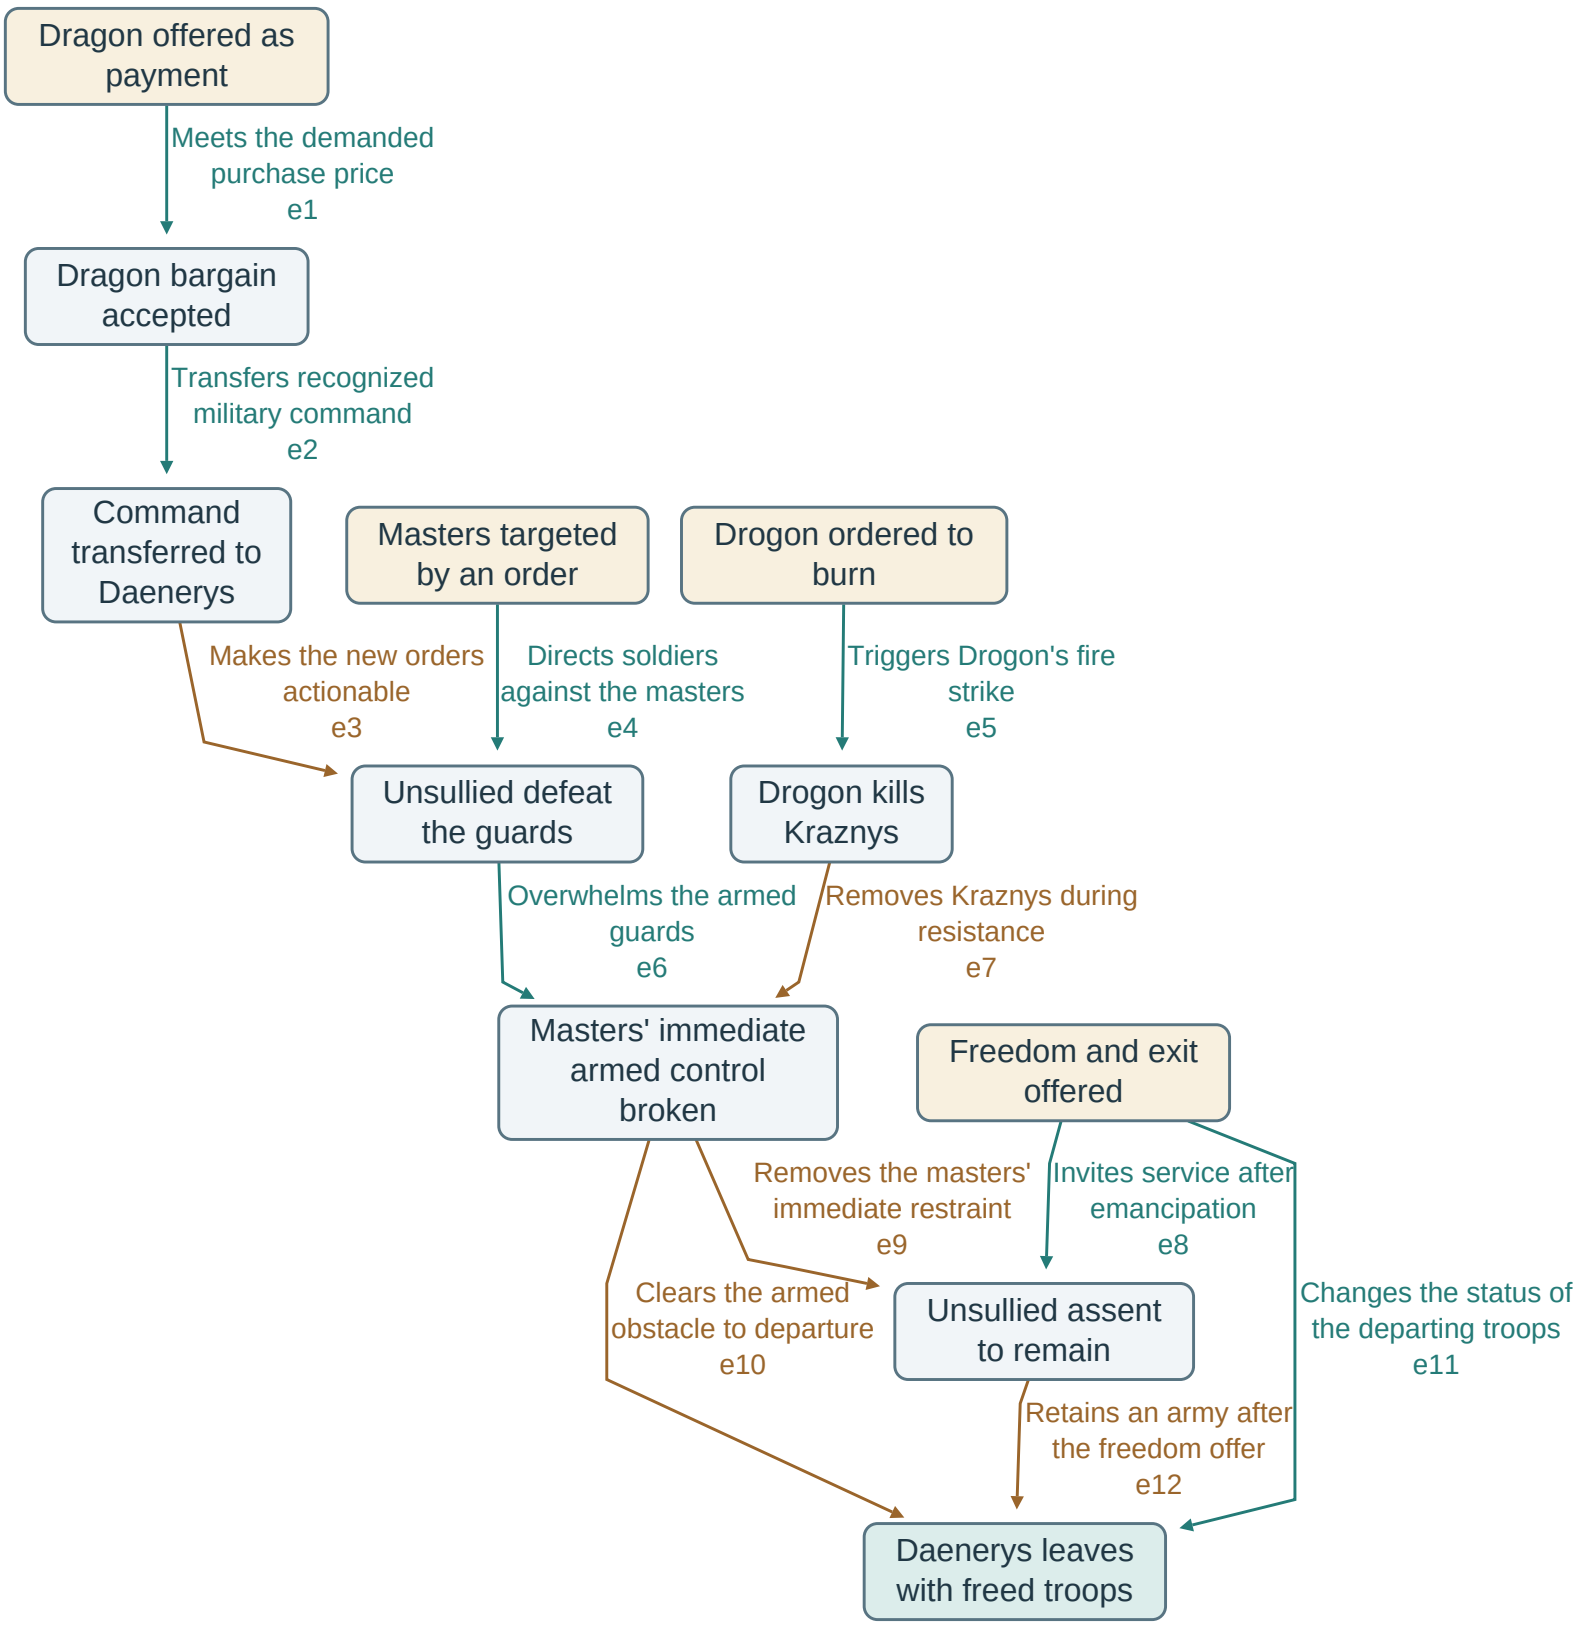

A: Relief and a field force are required for pursuit; a persistent enclosure blocks it.

B: A field force can pursue whenever not enclosed, including an assumed successful advance after avoiding the trap without relief.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.

16 | Daenerys's capture of Astapor

causal overview - generated TV interpretation

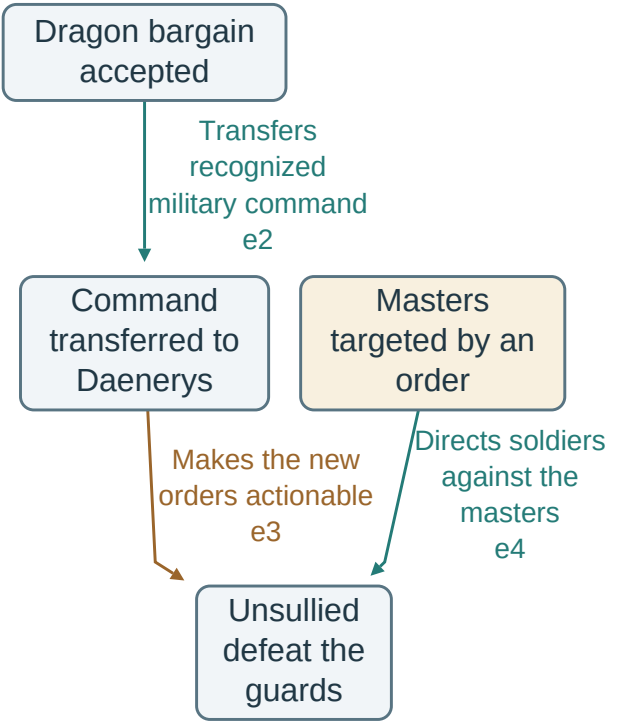

Outcome: Daenerys defeats the masters' armed control and departs Astapor with the freed Unsullied by S03E04.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

17 | Daenerys's capture of Astapor

mechanism detail - generated TV interpretation

Joint mechanism M_U

Both recognized command and the attack order are required for this implemented ground attack.

Passages: s03e04_S23

Partial function: 1 observed row; 3 input rows remain unconstrained.

Local view. Full operative model: overview. References and tables: catalogue.

Teal: direct process evidence | Ochre: contextual inference | Dashed: hypothesis

All complete functions add assumptions. Independent researcher review pending.

18 | Daenerys's capture of Astapor

What changes under the declared alternatives?

Daenerys defeats the masters' armed control and departs Astapor with the freed Unsullied by S03E04.

Observed outcome: YES. Scenario answers below are conditional.

Selected question	Partial family	Scenario A	Scenario B
Without Drogon's fire strike, does Daenerys still leave with the freed army?	**Unknown**	**No**	**Yes**
If Daenerys gives no order against the masters, does the freed-army departure occur?	**Unknown**	**No**	**No**
Without both transferred command and the dragon strike, does the freed-army departure occur?	**Unknown**	**No**	**No**

A: Both the ground attack and dragon strike are required to break the masters' immediate armed control.

B: The successful ground attack suffices to break immediate armed control; the dragon strike is not necessary.

Same mechanisms/background reused; no probabilities or natural counterfactual gold.
